Re: RE-NU-IT Home Improvements

We recently hired Jason Neal's company RE-NU-IT Home Improvements to rebuild our deck. During the initial consultation period Jason and Dan had many excellent suggestions to improve the deck design and connect it to a bridge over the fish pond.

The demolition was done efficiently as was the new construction. The crew worked hard and we were kept informed at each step. The workmanship was excellent.

Following the deck and bridge construction, we discussed the building of a stone patio. Jason was able to access Pennsylvania Bluestone stones to make the patio.

The whole project was completed to a very high standard. The design was creative and innovative. We are very pleased with the outcome of the project and highly recommend Jason and the crew at RE-NU-IT.
